Notes

I.An "Excellent Soil Condition" is that foundation material that can support a safe bearing pressure of 5 ksf and has an angle of friction of 33°.

2. If in the length of a wall the type of wall changes and provides for a different thickness of stem, then "Detail A" shall be used for all walls of

DATE:

greater than the least wall thickness.
3. Contractor has option of lapping main stem reinforcement with rear dowel reinforcement as shown; or by extending the rear dowel reinforcement with no splicing.

However, no additional compensation to Contractor will be allowed for whichever alternative is selected.

APPROVAL								
OFFICE OF STRUCTURES								
DATE: 7/16	/02							
REVISIONS								
SHA	FHWA							
8-10-04								
10-9-07								

4. These walls are valid if the sloping backfill levels off and traffic is present on the level area.
